***READ ALL INSTRUCTIONS THOROUGHLY FROM START TO FINISH BE FORE BEGINNING INSTALLATION! **

For questions or help with the installation, please email help@sdhqoffroad.com

INSTALLATION INSTRUCTIONS

STEP: 1

Unbox your 2023+ Colorado A-Pillar Light Mounts and lay out on a clean table. Verify that parts are present and familiarize yourself with them.

STEP: 2

Open the hood on your vehicle. Using masking tape, tape off the area that you will be working on to prevent any damage to paint during install.

STEP: 3

It is recommended to mark the outline of the hood hinge to the hood to ensure proper hood alignment is maintained after installation. Starting on the driver side with a ratchet and 13mm socket, loosen but do not remove the front and rear nuts from the hood studs.

STEP: 4

Position the driver side mount under the nuts but over the hood hinge and slide onto the studs on the hood. Tighten the nuts completely before moving to the other side. ****Recommended to have a person to assist in holding the hood/hinge in place to avoid alignment issues.****

STEP: 5

Repeat steps 2-5 for passenger side mount. Then install and wire your lights as desired.

YOUR INSTALLATION IS NOW COMPLETE.
